- 1) Population and Water Demand Projections
 - a. Met with representatives of SWFWMD and SJRWMD to coordinate demand projections methodologies
 - b. Worked with Districts to acquire all data necessary to complete projections
 - c. Completed summary of tables and graphs for TAC review
 - d. Completed entire Chapter for insertion into report

- 2) Water Conservation and Reclaimed Water
 - a. Evaluated Florida's EZ Guide Water Conservation Model and determined which data would be required to run the model to evaluate conservation potential for each utility
 - b. Obtained comprehensive reclaimed water data from the SWFWMD to begin the process of projecting the quantity of reclaimed water that will be available to offset demand through 2035.

- 3) Groundwater Availability
 - a. Met with staff from the Districts to determine how they will use regional groundwater models during the next year to evaluate groundwater availability. Also determined that we will model the impacts of wellfields on water resources and MFL waterbodies.

- 4) Technical Advisory Committee (TAC) Meetings
 - a. Constituted the membership of the TAC
 - b. Determined how the meeting will work, dates of meetings, and discussion topics.
 - c. Scheduled first meeting for April 24th.
